APPROVED

WEATHER
RESISTANT

EASY
INSTALLATION

SAVE
TIME & MONEY

GREEN

- Ideal for difficult and complex details
- Moldable, flexible and stretches in both directions
- Chemically seals to itself - no mastic or sealants needed
- Highly resistant to all weather conditions
- Butyl adhesive edges seal to most building materials
- Paint or stone coat to color match
- Non-toxic - Lead free

THE PREMIER CHOICE FOR ALL ROOF FLASHING NEEDS

Extremely flexible - stretches in both directions

FEATURE & BENEFITS

WEATHER
RESISTANT

Weather Resistant

Two heavy duty layers of Polyisobutylene (PIB) make Wakaflex® a tough, yet flexible flashing material resistant to UV, rain and snow. Its self-welding ability makes Wakaflex® extremely resistant to long term high temperatures, heavy rain and high winds.

EASY
INSTALLATION

Easy Installation Anywhere

Extremely flexible and stretches easily in both directions. No prefabrication or welding. No adhesives, mortar or mastic needed.

SAVE
TIME & MONEY

Simply cut the material to the size needed, shape and install right on the roof. Use multiple pieces to fabricate complex or large flashing details.

GREEN

Wakaflex® is the lead-free solution to flash all critical areas of the roof. Lead is the most common flashing material used still to this day.

The Occupational Health and Safety Administration (OSHA) declared that "lead adversely affects numerous body systems and causes forms of health impairment and disease which arise after periods of exposure as short as days or as long as several years."¹

Any place lead is used on a tile roof, Wakaflex® works better and more safely.

¹According to U.S Department of Labor - OSHA: Substance Data Sheet for Occupational Exposure to Lead - 1926.62 App A, Section II Health Hazard Data, Part B.

WAKAFLEX® IS TOUGH AND DURABLE

See how easy Wakaflex® is to install in our video at WestlakeRoyalRoofing.com.
